I turn ideas into live products. Full-stack and AI engineer who designs and delivers complete digital products for clients: web platforms, SaaS, e-commerce, travel technology and AI-powered tools. I handle everything from architecture and database design to deployment, and I choose the right stack for each project. Creator of the Masidy ecosystem, a growing family of digital products.

Masidy ecosystem

My own products, continuously growing

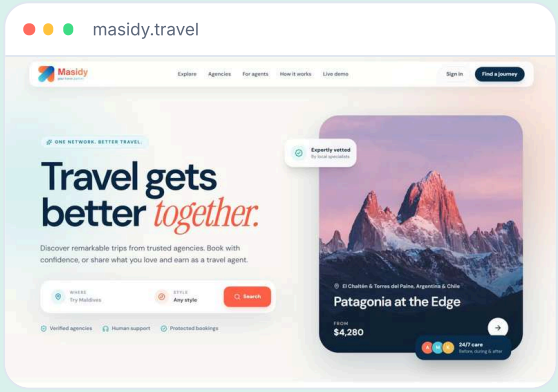

My product · Live

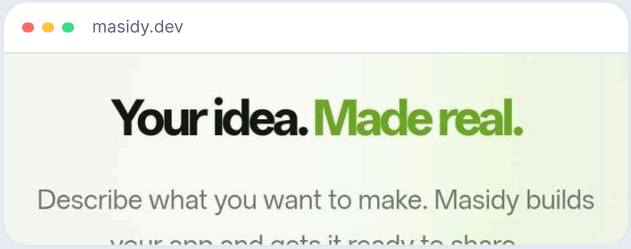

Masidy Travel

A multi-vendor travel marketplace that brings travelers, verified agencies and independent agents into one network. Agents curate agency-backed trips, share a personal storefront and earn commission on confirmed bookings. Includes an agent workspace, an agency portal and a live demo.

masidy.travel

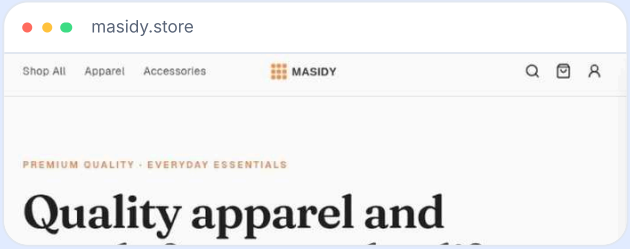

AI · Active development

Masidy.dev

AI app builder: describe what you want and it builds the app, with live preview, AI-assisted editing, version control and publishing.

masidy.dev

E-commerce

Masidy Store

A storefront for Masidy apparel and everyday goods, with a clear and simple shopping flow.

masidy.store

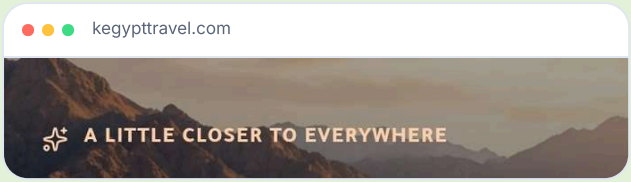

Experience

Freelance Software Developer & Product Builder — Italy · International clients

Design, development, testing and deployment of web applications, mobile apps, SaaS platforms, e-commerce and travel booking systems for clients. Responsibilities include software architecture, frontend and backend development, database design, API integrations, AI implementation, automation and performance optimization.

Client projects

Live websites and apps built for clients

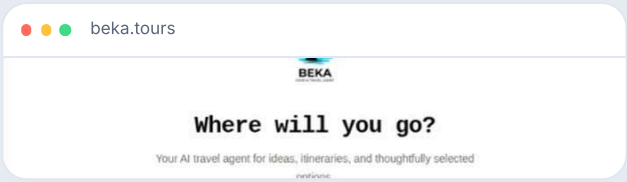

Travel

K Egypt Travel
